Week 1 (Due Oct 13)

What have we worked on?

Over the past week, we have focused on understanding the core objectives of our project, which centers on analyzing Boston's annual budget allocation trends. We've also engaged in discussions about the significance of the project and the type of data we'll be dealing with.

What will we be working on next?

We'll be diving into exploratory data analysis to identify preliminary patterns and insights from the datasets. Additionally, we plan to undertake data context research to better comprehend the nuances in our data.

Have we run into any issues? Do we need help?

One of the concerns we've identified is the potential bias in supplementary datasets. As we start the data analysis phase, we may need additional resources or expertise to ensure our analysis remains unbiased and that we address any missing values effectively.

Team Lead: Have we talked to the client recently? When are we meeting with them next?

We haven't had a recent conversation with the client post our initial discussions. We believe it would be beneficial to schedule a meeting with them soon, especially after our exploratory data analysis, to align on initial findings and gather their feedback.
